Thread Hardening

Treatment

Spreader Types

Internal Hex on  
bottom

### Product Description

Vent tubes are manufactured to your precise specification and drawing

All Vent Tubes are electro Polished to alleviate corrosion extending the performance life of the Vent Tube.

### Product Function

The product includes the features that provide the needed adjustments and durability to maintain tight fill height requirements.

The adjustability of sleeve to acquire the needed fill height allows the operation to make adjustments due to uncontrolled variables.

The heat treated threads ensures that they do not wear which can also cause variability in the process.
