Flight mounts make it easy to install

Eliminates the unpredictability of premature failure that is experienced with “D” style Grippers

Available in Black or White

Available with Quick Delivery

Product Function

The 3-Finger design increases grip strength while increasing life by reducing the stress on the rubber at the flex point.

The design has also eliminated the hidden tunnel that is inherent in the “D” style design...eliminating the high risk area where mold grows, creating a higher sanitary solution for your filling operation.

“D” Style and “J” (3-Finger Style) Grippers
