

## KHS Valve Lever for Bottle and Can Fillers

### Notable Features and Benefits

- ✔ Opening Torques can be adjusted to operational needs
- ✔ More consistent torques during operation
- ✔ No Brake pads that can cause contamination or become loose
- ✔ Braking spring material that extends life
- ✔ Clean design eliminating potential bacteria build-up
- ✔ Reduce inventory...Same Lever for both Can and Bottle Fillers...Just change the Butterfly

### Product Description

All Parts are food Grade non Toxic

This design has eliminated critical sources of failure including variability in torques over time, longer life of the Spring and potential contamination from brake dust

Easily installed on all KHS Bottle and Can fillers

### Product Function

The Valve lever opener is designed to consistently actuate the filling valve on KHS Bottle and Can line Filling equipment.

The adjustability of the torques for your production specific requirements ensures best control during the filling process and consistency over time.
