

Krones Centering Bell—Bottle Filling Line

Notable Features and Benefits

- ✓ Drop in design. Fits in Krones Centering Guide.
- ✓ Seal change over by operator on line in seconds
- ✓ Greater than 50% savings over OEM replacement components
- ✓ Component availability shipped within 24 hours

Product Description

The Centering Bell designed specifically for the Krones Bottling Lines has combined the simplicity of repair and maintenance with performance for your filling operation.

This new simplified design has enabled the ability for any operator to changeover the Centering Bell in seconds; as well as changing out the seal on line all by hand

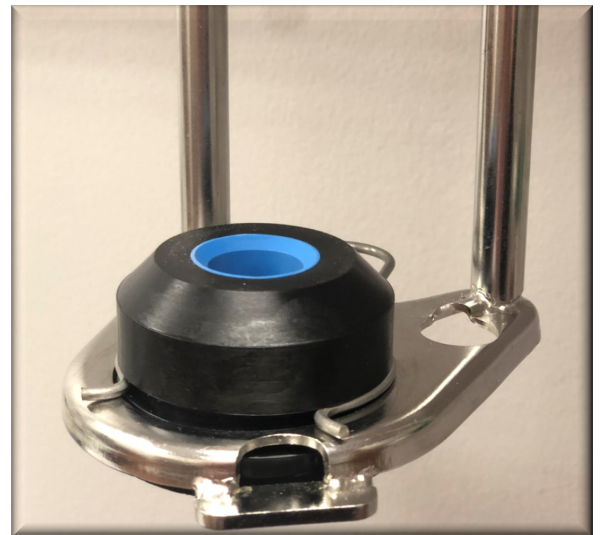

The seals are available in multiple durometers to ensure the proper sealing during the filling process tailored to your exacting operational needs and conditions.

Product Function

The Centering Bell is designed to fit in the current Krones OEM Centering Guide System providing a large centering window and allowing ease of Seal Changeover.

Recommended to use the SR-14-A-85 seal and K-101-CLIP from Marks Machinery for best performance.

The Marks Machinery 30 year proven design keeps the seal secure during operation while maintaining a superior seal.
