

CIP Device for Kronos Bottle Fillers

Notable Features and Benefits

- ✔ Stainless Steel Version of the Kronos OEM CIP Device
- ✔ Drop-in Design at <50% cost of OEM Plastic Version
- ✔ Eliminates potential source of cracking due to thermal stresses in Plastic at elevated CIP temperatures
- ✔ Withstands highest degree of Sterilization to maximize antimicrobial confidence

Product Description

Designed to replace the Kronos OEM Plastic version of the CIP Device at 50% lower cost.

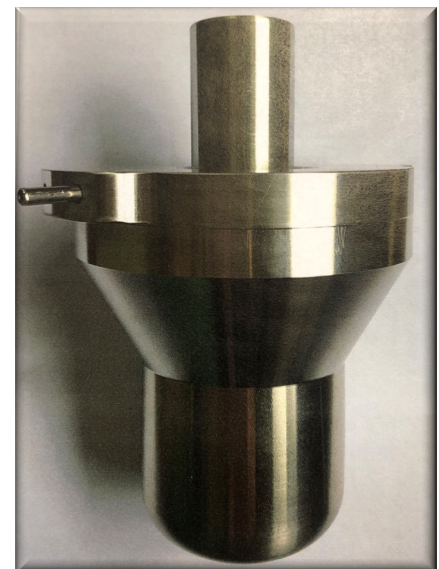

Made of 304 Stainless Steel

Viton Rubber Seals Available

Product Function

The CIP device was designed to create a hermetic seal between the valve and this unit. Allowing for the production line to cycle through the CIP process.

The unit is designed to withstand the various corrosive chemicals and temperatures that are introduced during the CIP process of Kronos beverage filling equipment..
